EXPERIENCE

Amazin Choices LLC (Subsidiary of UTY Corporation)

Houston, TX

AI Automation & Analytics

Jan 2026 - Present

- **Cleaned and validated retail data from multiple platforms** (5+ sources) using Python and BigQuery, **fixing 70+ data issues** and improving overall data accuracy for reporting.
- Built SQL queries and Tableau dashboards to track revenue trends, product performance, and marketing results, **reducing manual reporting effort by ~30% (estimated based on time saved)** and enabling faster decision-making.
- **Built AI automation workflows in n8n** for email marketing campaigns using APIs and customer segmentation, **increasing customer return rate by ~10% (based on repeat purchase behavior)** and reducing manual campaign setup effort

New Jersey City University – NASA Funded AI Research Project

Jersey City, NJ

Undergraduate Research Assistant – Lead Student Project

Sep 2025 - Present

- **Built a Python-based pipeline to evaluate and compare spacecraft image processing methods**, improving consistency and efficiency of model evaluation across datasets.
- Analyzed model performance using **precision, recall, and F1 score**, identifying top-performing approaches with up to **0.70+ F1 score on benchmark datasets**.
- Presented findings and collaborated with the research team to support model selection and improve evaluation workflows.

New Jersey City University

Jersey City, NJ

Undergraduate Research Assistant

June 2025 - Aug 2025

- Analyzed financial transaction data **using Python to improve fraud detection performance** on highly imbalanced datasets.
- **Built a data processing workflow for cleaning and transforming large datasets**, improving data quality and reliability for analysis.
- **Increased detection recall to 87.8% and achieved 0.97 ROC-AUC** by evaluating multiple modeling approaches across Logistic Regression, Random Forest, XGBoost, and LightGBM.

PROJECTS

AI-Powered Marketing Automation System (Amazin Choices LLC) | [Github](#)

Feb 2026 - Present

- **Built an end-to-end AI-powered email marketing system using n8n, Generative AI, and REST APIs**, automating content generation, customer segmentation, and campaign delivery at scale.
- **Integrated Gmail and Google Sheets** to orchestrate dynamic data flow across services, reducing manual campaign execution effort and improving targeting efficiency.

Predicting On-Time Shipping with Machine Learning | [Github](#)

Sep 2025

- Built a **machine learning pipeline** to predict delivery delays using **Logistic Regression and SVM** on a dataset of **43K+ shipping records**.
- Engineered features (distance, traffic, weather, delivery behavior), achieving **80% prediction accuracy**.

Sales Dashboard & Reporting | [Github](#)

May 2025

- Built an Excel dashboard to track key KPIs including revenue trends, product performance, and regional sales.
- **Used Excel functions, Pivot Tables, and VLOOKUP** to clean, standardize, and combine multi-source data, improving data consistency and reducing manual analysis effort by ~20% (estimated based on time saved).

Data Warehouse and Integrity | [Github](#)

Mar 2025

- Designed and implemented Bronze–Silver–Gold warehouse architecture in PostgreSQL for ERP/CRM data.
- **Built ETL pipelines** to extract, clean, and transform data; implemented **40+ data quality checks** to ensure accuracy and consistency.

TECHNICAL SKILLS

Programming & Databases: Python (Pandas, Numpy), SQL (PostgreSQL, MySQL, BigQuery)

Data & Analytics: Data modeling, ETL pipelines, Data validation, Data warehousing

Visualization: Tableau, Excel (PivotTables, VLOOKUP)

AI/Automation: n8n, LLMs, Generative AI, REST APIs, Prompt Engineering

Tools: Git, GitHub, Jupyter, dbt, Docker

EDUCATION

New Jersey City University, Jersey City, New Jersey

Exp: May 2026

Bachelor of Science in Computer Science - GPA: 3.9
